Subject: RE: Pesticide Environmental Action Levels (EALs)

Thanks Pam! Here is my contact with HI. She has been responsive to my requests of info. Re this latest email she stated that she would get oil data from HC and get back to Mrs. Personal Matters / Ex. 6

Hi Angeles,

Who in the state have you contacted ? I can ask my HI lead person to contact the State Lead Agency to see if they have heard from the person that sent the complaint. Until we find out more information, the main thing for you to know is that all label instructions must be followed by any applicator. We would need a real investigation and samples taken by an Inspector to see what is going on. A Hawaii inspector could do that, as well as records check on applications. Or our Enforcement Division could do it. We need to find out more from the state first.

I am out on Friday, but will pursue this with Mary Grisier in my group on Monday. In the meantime, let me know who you have been talking to in Hawaii.

Thanks,
Pc

Hi Pam, I know you probably get pull into multiple directions and I am hopping you can provide us some guidance on how to deal with the situation below. This isn't related to a superfund cleanup but more to a legally applied pesticide in

a military housing. I have been in contact with the state but I'm trying to see if there is anything we can do under our pesticides program or the federal facilities coordination work that Julie Jordan in your group does.... Please let me know when you have some time to discuss further. Hope all is well. Thanks. Angeles

FYI --

Doesn't she deserve a call to let her know that AH is the point of EPA contact?

It is not good that she continues to send messages my way, here's nothing from me yet continues to believe that I am her point of access.

Mr Wilson, I know you are very busy and if I need to address this with another person in the EPA I would appreciate it if you could please give me a contact. We just retested the indoor air of our home attached are the results. We are being relocated back to the mainland due to the medical issues our family is suffering, since the medical community here has not been able to find a cause and we have been exposed to these gases for the last 5 years of living here. SOMEONE need to help the residents of Hickam communities....there are other homes that have tested positive ours is the only one that has had multiple tests showing the fluctuations. These readings are higher then our original readings for Heptachlor and it is not even the hottest part of the year here yet. If there is someone else I should be contacting for this...please tell me. Thank you

According to the State of Hawaii only heptachlor was used to treat some homes. See the last paragraph of the file below under Heptachlor.

<http://eha-web.doh.hawaii.gov/eha-cma/Downloads/HEER/termicidefactsheetfinalsept2011.pdf>

Please see attached results.

Note: Detected large unknow peaks with retention times below that of heptachlor for both samples.

Best,

Dr. Cassidy

Good Morning **Personal Matters / Ex. 6**

Your question or inquiry to the “EPA Information Contact Form” regarding health-based action levels for several pesticide compounds has been referred to my office. I just attempted to phone you directly via the contact information provided **Personal Matters / Ex. 6**

Please feel free to contact me directly via the contact information provided below. I would be happy to speak with you about various environmental screening action levels & their derivation. For your convenience, U.S. EPA’s health-based Regional Screening Levels (RSLs) can be found at:

http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/Generic_Tables/docs/master_sl_table_run_JAN2015.pdf

Best Regards...
